

ARMSTRONG POWER SYSTEMS

AGpower-ATS

30 - 5000 Amps

Affordable line of transfer switches specially engineered for AG application. All microprocessor technology logics provides greater accuracy and flexibility for your most demanding standby electric applications.

Up to 600 Volts, 2, 3 and 4 pole configurations.

FEATURES AND OPTIONS

- Reliability by means of fewer parts.
- Adjustable normal/emergency source sensing.
- Programmable time delays TDNE - TDES - TDEN - TDEC.
- Pilot lights.
- Engine start contacts
- Manual transfer.
- High withstand ratings.
- Plant exerciser.
- NEMA 1 enclosure
- NEMA 3R
- NEMA 12
